PLANTING SEASONS

The SPRING PLANTING SEASON begins as soon as the frost is out of the ground and continues until early June. Evergreens and Perennials can be safely transplanted until the latter part of June.

The FALL PLANTING SEASON for Evergreens begins about the middle of August and continues through September. Deciduous Trees and Shrubs can be safely moved after we have had one or two frosts and continued until the ground is frozen. Perennials do best when moved during September and before the middle of October.

This variety was introduced by the Arnold Arboretum from whom we procured our stock. We have been growing it for several years and have found it perfectly hardy. The foliage, which turns to a beautiful bronze in the Fall, makes it particularly desirable.
